2. Answer the following: HTML has a way to scale an image down by entering a smaller width in the width attribute of the img tag. Why is scaling it down in Photoshop a better idea?
Even though HTML has a way to scale down our images, using photoshop is a better idea because it will keep the quality and resolution of the image intact. That way, it will appear clearer on our websites.
3. Answer the following: What main message were you trying to communicate with your original image? Explain how the different parts you put together helped communicate that message.
As I pondered what image to put on the web of myself, I chose one of me in Australia because I was so happy there and the image quality was great. I took the background out of the photo and added in a blue striped background because I felt as though it represented the water I was constantly around and pertained to where I find myself happiest – near the water. I also chose the quote “Focus on the step in front of you, not the whole staircase.” Because it’s a quote I constantly try to remind myself of especially at this time during the job application process.
4. Submit answers to the following:
 - a. What questions did you have about the lab?
 - i. I don’t have many questions about this lab, maybe just how I can change my photo to make it come off as more horizontal rather than vertical without cropping the image.
 - b. What was the hardest part of the lab?
I didn’t find many parts of this lab difficult, I guess the only hard part for me was transporting my images from my desktop to the remote lab desktop.
 - c. Rate your comfort level with this week's topics.
 - 1 ==> I can do this on my own and explain how to do it.
 - 2 ==> I can do this on my own without any help.
 - 3 ==> I can do this with help or guidance from others.
If you choose this level, please indicate HOW this person helped you.
 - 4 ==> I don't understand this at all yet and need extra help.
I rate my comfort level as a 1.
